

PROFESSIONAL CLEANING SERVICE OF THE YEAR

High Standard Cleaning Services Ltd

High Standard Cleaning Services (HSCS) is an accredited family-run cleaning business offering education premises, commercial, office, industrial, grounds, washroom and hygiene, and window cleaning. The talented team have 35 years of combined experience in the industry, and boast the skills and commitment required to deliver consistently high standards of cleaning; giving clients peace of mind and the ability to focus on their business objectives. Each client can expect a free, no-obligation consultation and quotation, whether they're seeking daily or one-off deep clean services. HSCS also offers monthly cleaning, post-build cleans, and carpet and upholstery cleaning.

The judges were impressed by HSCS's efforts during the COVID-19 pandemic. In order to optimise protection levels and stop the spread of the virus, HSCS added a bio-fogging treatment to their list of services, which is non-toxic, cost-effective and incredibly long-lasting. The fast-working sanitation solution targets a vast array of microbes, eliminating a great number of harmful pathogens, including those located in harder-to-reach areas. Perfect for use in places where people are more susceptible to infections or bacteria, the powerful biocide treatment has been instrumental in protecting several essential businesses such as nurseries, retirement homes and universities.
